

Rush University Medical Center

ID BADGES AND SCRUBS POLICY

Rush I.D. badges (issued by Rush Human Resources) **must be displayed visibly above the waist when on Medical Center property.**

While I.D. badges must be worn everywhere on the Rush campus, Rush scrubs are **not permitted outside of designated areas**. This policy is an important part of infection control and must be followed to the letter.

Rush logo blue scrubs are authorized to be worn in the following departments only:

Operating Room	In-Virto Fertilization Lab
Post-Anesthesia Care Unit	Labor and Delivery
Ambulatory Surgery	Operating Room Sterile Processing Department

And Rush logo green scrubs are authorized in the following departments/or for the following personnel only:

Cardiac catheterization	Interventional Radiology
Electrophysiology Lab	Nonsurgical housestaff (fellows, residents, interns)
Cardiac Biopsy Lab	Medical students (when on call)

No Rush logo scrubs — whether blue or green — may leave the hospital premises.

Those authorized to wear *Rush logo blue scrubs* must wear a ***clean buttoned white lab coat or a closed blue cover gown*** at all times when traveling outside the designated area. In addition, masks and covers must be removed and **hospital I.D. badge must be displayed.**

This is necessary to make Rush the safest possible place for our employees, our students, our volunteers and, most important, our patients.

If you have any questions about any Rush policy, refer to the “What Every Rush Employee Should Know” guide or call the **Quality Improvement Department at ext. 2-7116.**
