ORA No.: _____
PROJECT TITLE**:** _____

FUNDING AGENCY (*If NIH, specify agency*): _____
PROJECT PERIOD: from _____ to _____

MODIFICATION INFORMATION
Check box(es) which apply to this modification
☐ Change in protocol
☐ Change in investigator/co-investigator(s)
☐ Change in funding source
☐ Other: _____

Describe the changes planned for this protocol - these changes may be procedural, administrative, etc. Be detailed. Please explain why these changes are necessary. Attach additional *numbered* pages if needed.

_____

Assurance
The undersigned assures, to the best of his/her knowledge, that the procedures and activities included in this application do not involve the use of human subjects (directly or indirectly), and that these procedures and activities are completely and accurately described. Furthermore, if the Principal Investigator decides to modify the procedures and activities outlined to include the use of human subjects the Rush-Presbyterian-St.Luke's Medical Center's (RPSLMC) Institutional Review Board must review and approve the research prior to initiation. The Principal Investigator also assures that, if applicable, this description of procedures and activities is entirely consistent with those proposed in the grant application(s) submitted to funding agencies outside this institution to support this project. All protocol activities will be performed in accordance with RPSLMC policies as well as State and Federal regulations. In addition, no activities involving the use of animals, recombinant DNA, radioisotopes, etc., will be initiated without prior review and approval by the Rush-Presbyterian-St.Luke's Medical Center's institutionally appointed committees.
