KNOW YOUR STROKE SYMPTOMS

These symptoms are commonly identified with stroke:

**Drooping**
Face drooping on one side

**Weakness**
Arm weakness or numbness, particularly on one side of the body

**Speech**
Slurred speech or difficulty speaking

**Vision**
Loss of vision or double vision

**Vertigo**
Feeling like you or the world around you is spinning

**Confusion**
Difficulty understanding language

**Headache**
Sudden severe headache (often described as "the worst headache I've ever had")

If you experience any of these symptoms, call 911 immediately. Even if the symptoms don't cause pain or go away.
